

Project Designer

Studio 3 Design is looking for an experienced professional to join our growing company in a Project Designer role.

The Project Designer is responsible to provide technical expertise and design execution for the project team for all phases of a project's development. The successful candidate must have the ability to plan and meet project deadlines, work closely with the project team, and have a holistic understanding of design and construction processes.

Responsibilities:

- Experience and proficiency with AutoDesk programs including Revit in the production of Design and Construction Documents.
- Experience with other 3D modeling, rendering software and Bluebeam and other cloud based software.
- Effective communication skills and ability to work, both independently, and as a part of a project team.
- Attention to detail and the ability to manage multiple tasks simultaneously.
- Familiarity with all local, state and national building codes, including ADA, FGI and Fair Housing.
- Strong organizational and time management skills.
- Attend client meetings and ability to help facilitate long term client relationships.
- Ensure that Owner criteria are being met by all disciplines.
- Ensure that project deliverables, documents and schedules, are met by the Project Team.
- Construction administration and site observations to assess the quality of the work.

Experience/Education:

- A Bachelor's or Master's Degree in Design or Architecture from an accredited university.
- 5 years of experience in a related field (*Healthcare experience is a plus*)
- Licensure preferred
